

NORTH CAROLINA "A Good Place to Live"

Do you realize that this State is second only to Massachusetts in textiles, that it makes more cigarettes than any other in the world, that it has the largest leaf tobacco market and has the greatest of all aluminum reduction plants?

North Carolina textile mills produce approximately one-sixth of the entire United States output.

It has no crime waves and has the lowest per capita prison population and the highest birth rate in the United States.

It has the climate of the Mediterranean, yet contains the highest mountain in Eastern America.

If anybody wants a place not only to make money but to enjoy life and bring up his family he should consider North Carolina.

THRIVING VILLAGES ARE SEEN ON EVERY HAND IN NORTH CAROLINA
